

ALMATIN INTERNATIONAL

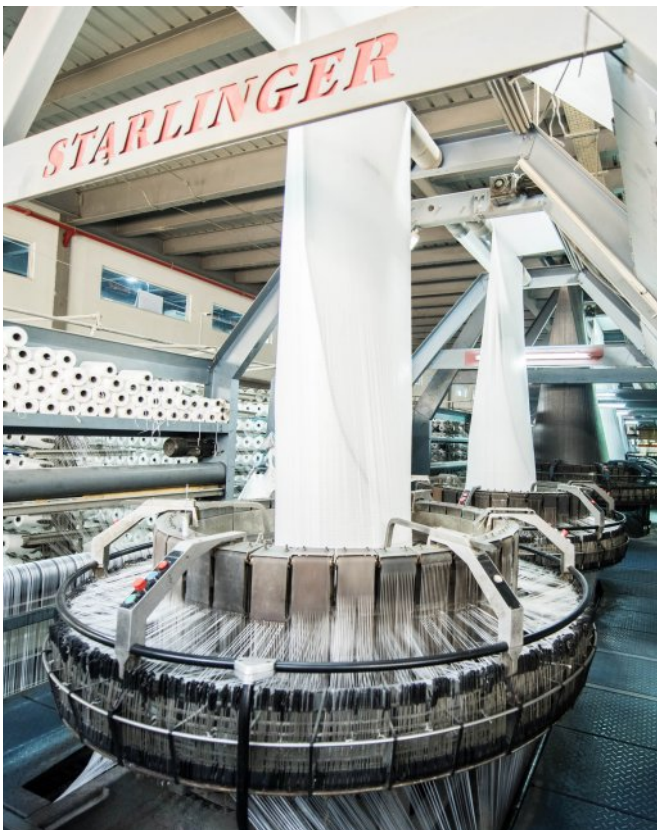

FOR PLASTIC INDUSTRIALS

Al-Matin International for Plastic Industries was established at the beginning of 2012 on an area of 18,000 square meters in the second industrial zone, Jeddah , Kingdom of Saudi Arabia.

ABOUT COMPANY

One of the leader Companies manufacturing PP woven bags in K.S.A. Our factory started working in 2012. Therefore, AlMatin Factory has experience in producing all types of these bags. Moreover, the factory has earned many certifications including ISO 9001-2015, ISO 14001-2015, and ISO 45001-2018. In fact, it is well known to be one of the biggest factories that produces and exports high-quality standard PP bags.

• BAG'S SPECIFICATIONS:

Loading Capacity	From 5 kg to 2000 kg
Bag Width Range	From 27 cm to 120 cm
Bag Length Range	From 39 cm to 131 cm
Bag Deniers	From 500 to 1400
Color Printed	All colors with Max 6 color

TYPES OF PRODUCTS:

- Polypropylene Bags
- Polypropylene Jumbo bags
- Polypropylene Valve Bags (AD* STAR)
- Polypropylene woven fabric Rolls

Polypropylene Jumbo Bags

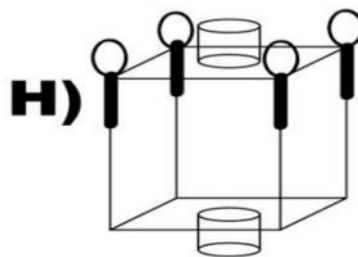

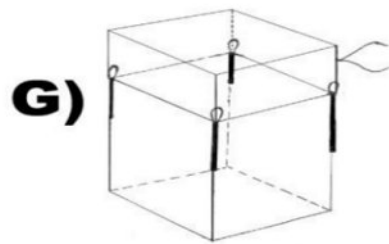

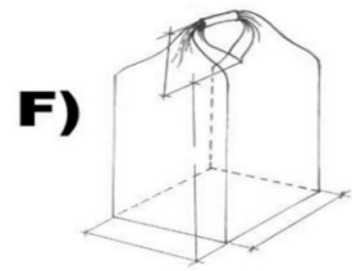

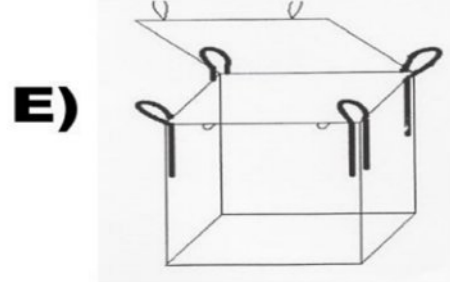

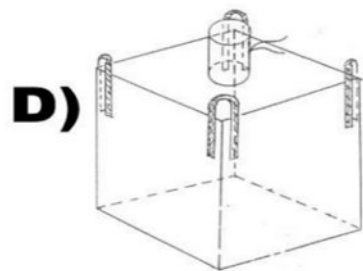

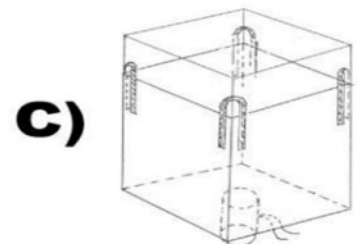

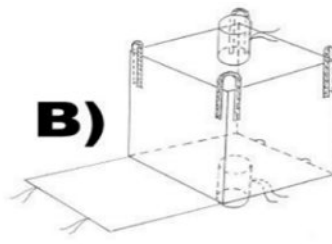

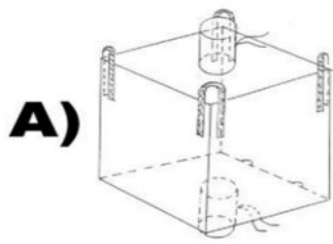

One of The Largest Manufacturing companies of New Jumbo bags in KSA & GCC Countries with European technology machines in this field and global safety standards and quality.

■ PRODUCT FEATURES

- 1 UV Stabilization, all components of FABICs are UV stabilized.
- 2 FABICs are made from food grade polymers.
- 3 Flexible fabric specifications: Coated, Uncoated, All colors, Printing up to 8 Colors.
- 4 Loops, available as per customer requirements with various designs & Styles & colors.
- 5 Lifting Safety Factors, 5:1 & 6:1 as required by the buyer.
- 6 Liners: Loose or Glued.

JUMBO BAGS SAMPLES

- A. Normal Jumbo Bag with Filling & Discharge Spout.
- B. Normal Jumbo Bag with Filling & Discharge Spout & Bottom Cover.
- C. Duffle Type Jumbo Bag with Discharge Spout Only.
- D. Normal Jumbo Bag with Filling Spout Only.
- E. Normal Jumbo Bag with Top Cover without Filling & Discharge Spout.
- F. Single Loop Jumbo Bag with open Top.
- G. Duffle Type Jumbo bag without Discharge Spout & Belt Stitched on the Corner.
- H. Normal Jumbo Bag with Filling & Discharge Spout Belt Stitched on the Corner.

POLYPROPYLENE VALVE BAGS (AD*STAR)

Our Europe Technology machines manufacture high-quality bags according to both standard and market requirements. We continuously upgrade our machines with the latest and most advanced technology, ensuring our products meet the highest standards of quality.

PRODUCT FEATURES

- ◆ Designed for the automated high-speed filling through the valve.
- ◆ Has flexible valve side & an external or internal valve to match the special filling machine.
- ◆ Has the improving packing efficiency, transportation, strong firmness, Compared with the ordinary bag.
- ◆ Can be stacked high, which can help to save space in warehouses and storage facilities.
- ◆ Reduced waste in bags during packing, handling, and storage.
- ◆ Water Resistant ,Anti – UV Treatment and Recyclable.

Top Left

LAMINATING MACHINES

Laminating machines are used to apply a layer of molten plastic film to the surface of the woven bag. The film is melted by an extruder and then applied to the bag as it passes through a series of rollers.

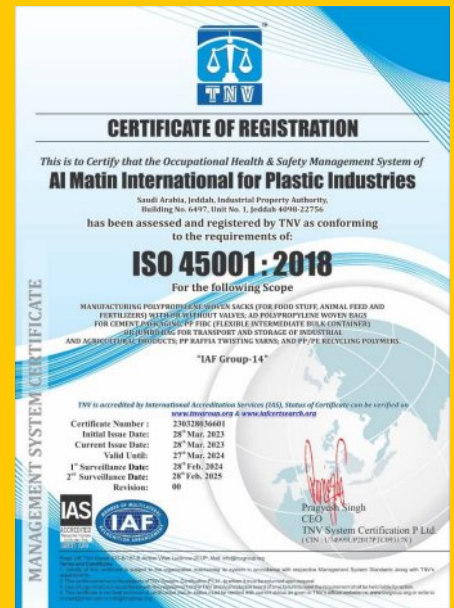

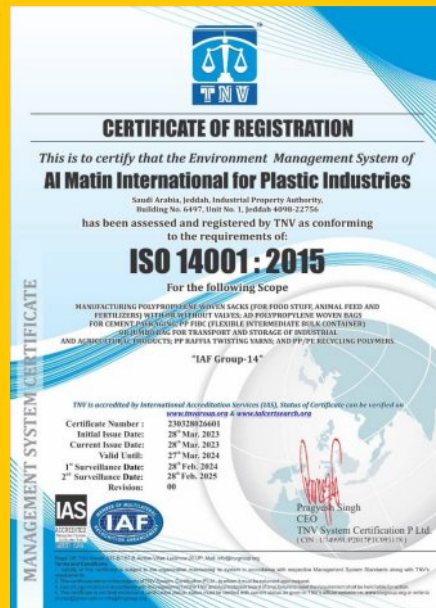

AD*STAR® VALVE MACHINE

It's specifically designed for manufacturing a patented type of woven polypropylene bag called the AD*STAR® block bottom valve sack.

QA CERTIFICATION

Demonstrate a high level of performance in many areas.

ALMATIN INTERNATIONAL FOR PLASTIC INDUSTRIALS

Hopefully, we can work together
and our projects will be
successful.
